A Sharp Advance in Panama-Other Stocks Steady and Generally Firm.

GOLD QUOTED AT 115.

on Call-Government and Railroad Bonds in Moderate Request.

MONDAY, April 19-6 P. M. But for a sudden and large advance in Panama the stock market to-day would have offered little material for comment beyond the general statement that the majority of prices were a triffe higher than those of Saturday, and that the undertone is regarded as encouraging by those who are on the bull side of speculation. Whether this feeling is due to the exceptional rise reterred to or grows out of faite in future strength is a question difficult to determine. The burden of testimony by brokers, however, favors the latter supposition. The cause of the movement in Panama is not yet definitely known, save to a iew, and the sales on which the rise occurred amounted to the insignificant figure of 1,305 shares. The bidging, however, was active, and it

THE ABSENCE OF STOCK, or rather it was because the few holders of the stock preferred not to sell, that the unusual advance took place. The opening sale was made at 130, at which price two hundred shares changed hands. Fue next transaction was in 5 shares, on the basis of 135, and the others which followed were respectively marked at 135, 140, 142, 145, 147, 148, 145 and 146. Pacific Mail was the most lively stock on the list, the sales amounting to 97,0.0 shares, it being rumored that arrangements had been satisfactorily made between the company and the Panama directors, but the story lacks confirmation. The stock opened at 44%, declined to 1/4, advanced to 45%, receded to 45, and closed at 45%. The report was published that the Occidental and Oriental Steamship Company (which is said to be owned by the Central Pacific and Union Pacific Railroad companies) have sent out the first of their steamers, chartered from the Waite Star line, to unite with the Pacific

should prove true very important changes may occur at no distant day in the value of certain stocks that are now supposed to be in process of combination. If Panama, with its forty-nine miles, can successfully compete with the overland railroads by running lines of steamers on both sides of the isthmus the price of its stock will materially advance. If not, its chief dependence will be on freights from New York, Europe and the South American ports. This is the comment of throughtful observers of the street, who do not think that a narrow isthmus can possibly hold the whichand over the commerce of a continent. Another active stock of the day was Erie, of which some 32,000 shares changed hands. The fluctuations, however, were slight, 31% being the opening figure, 30% the lowest and 31% the highest and ast. Union Pacific was dealt in to the extent of 36,500 shares with a range between 71% and 72%, which was the closing price. The telegrams concerning freshers exerted a depressing effect, but these were followed by more favorable an-nouncements. Other stocks were comparatively stendy, as will be seen by the following table, which shows the
